## Legacy Boom Discount Program

Legacy parts are defined as items no longer in current production. As cranes age and as new boom fabrication technology advances, considerable manufacturing costs are added to legacy booms -- sourcing non-current materials takes time, material cost is higher, and using older assembly methods can add many hours in the build process.

Manitowoc Crane Care has adopted a new pricing strategy to address the increased cost of producing legacy booms. A new formula is now being applied which maintains individual boom pricing on a parallel with the value of the crane being repaired. In short, as the crane ages, legacy boom profit margins will be adjusted downward automatically to assure competitive pricing.

### Benefits:

- More security. Questionable will-fit parts can be avoided.
- Crane remains 'original', adding to resale value!
- Using original engineering specifications assures correct form, fit and function.
- Reduced cost for the crane owner!

Legacy Boom items with reduced pricing:

2176900078	BOOM EXT NOSE ASSY
2184900212	OUTER MID SECT WELD
2188910043	INNER MID WELD
2189910092	SECTION, BASE
2195900005	FLY SECTION WELDMENT
2197910080	BOOM ASSEMBLY - 5 SECTION
6164000960	BASE SECTION WELD
6164000971	NOSE TO FLY SECT WELD 3
6164001833	BOOM EXT ASSY-FIXED
