

## Tier III Repowers

**EnCORE**

Rebuild. Repair. Remanufacture. Exchange.

Regulations on diesel emissions are changing rapidly which limit your ability to use your crane. EnCORE has developed programs to repower Manitowoc 4100, 4600, 888, and 999 cranes with Tier III engines to keep your crane working. Whether it is completing the repower at an EnCORE facility or having EnCORE provide an experienced technician to help you complete your own repower, EnCORE can help you get that crane back running. Call EnCORE at 1-501-557-5800 to work out your repower today, or email [EnCORE@manitowoc.com](mailto:EnCORE@manitowoc.com).
