Lattice Crawler Torque Converter Exchange Program

Your Crane Care Distributor has some very special pricing still in effect for the Lattice Crawler Torque Converter Reman Program. Pricing remains competitive in the marketplace.

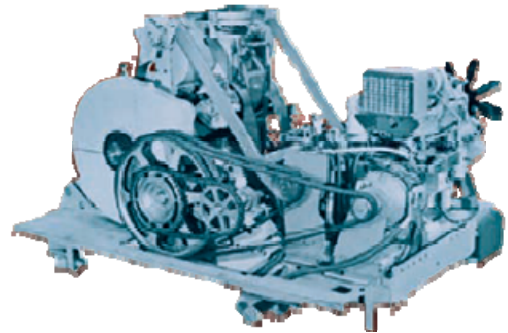

Know the WARNING SIGNS of a failing converter:

- Unusual noise or vibration in the converter
- Continuous overheating
- Excessive oil leakage

It is more convenient, and more importantly, less expensive to replace the converter before it fails!

Receive all of the following benefits when you purchase a factory-specified EnCORE Remanufactured Torque Converter from your authorized Manitowoc Crane Care distributor:

- Torque converters are remanufactured to exact factory engineering specifications
- 12-month warranty for lift cranes and 6-month warranty for duty cycle machines
- Each converter undergoes factory-specified spin test and operating temperature test procedures before shipping
- Most items in stock, others available in 1-3 days
- Only 100% Genuine Parts are used during the remanufacturing process

Manitowoc Crane Care and our distributors are constantly striving to improve after-the-sale support and to offer products that can add value by saving downtime and reducing maintenance costs.

Please contact your Crane Care Distributor for all the details on this exciting new program! To locate an Authorized Distributor near you, go to www.manitowoc.com, click on the appropriate crane company, and follow the distributor locator links. Or, if more convenient, email EnCORE@manitowoc.com.
