

Special lubricant for steel ropes

Extends life of heavily loaded wire ropes and their components.

Advantages:

- Deposits a protective oil film which resists to the mechanical pressures naturally generated by the external fittings (pulleys, drums...).
- Reduces frictions, abrasive wear and fouling.
- Protects against rust and corrosion.
- Penetrates quickly and deeply in steel rope to lubricate strands and cores.
- Weather resistance.
- Extends life of heavily loaded wire ropes, pulleys, drums, guides, pins and rollers.

Operating instruction:

- In order for effective application, we recommend you clean the wire rope carefully before processing.
- Spray a thin layer in several times for optimal protection.
- For ease, apply the spray when the wire rope is being wound on the drum.

400 ml aerosol
P-61032-70

Recommended by Potain for the maintenance of wire ropes of its cranes
