

# WHY CHOOSE A **GHC?**

How Grove telescoping crawlers cranes can build your bottom line

## THE WORKHORSE OF YOUR FLEET

The GHC's robust design, high lift capacity, long boom and versatility combined with the high quality you expect make them an essential part of your fleet.

## IDEAL FOR BUSY JOBSITES

The GHC's compact design, excellent gradeability, narrow tail swing, low ground bearing pressure and exceptional maneuverability is ideal for constrained and challenging jobsites.

## MULTIPLE APPLICATIONS

Telescopic crawler cranes are ideal for general construction, infrastructure and utility building applications.

## OPERATOR COMFORT

With ample cab space, air suspension seat, color monitor with cameras, climate control and tilt cab, the GHC Series cab is the ideal work environment for maximum productivity.

## QUICK AND EASY SET-UP

Some GHCs are transported on one truck and are ready for operation immediately after unloading. When multiple trucks are required, set-up is quick and easy without the need for an assist crane.

## VERSATILE TOOLS TO GET THE JOB DONE

Making it the most versatile crane in your fleet, GHCs can come equipped with augers, pole claws, baskets, boom extensions and inserts.

## PICK AND CARRY YOUR WAY TO PROFITABILITY

100% pick and carry capabilities provide you the freedom to move around your entire jobsite.
